

THURSDAY 4TH JUNE 2015

UNDERSTANDING TRADITIONAL BUILDINGS

Whitehaven Townscape Heritage Initiative is running a free event on understanding traditionally constructed buildings. In the morning James Innerdale, an experienced conservation Architect, will discuss maintenance issues and why they are important, the use of lime and the repair of sash windows. In the afternoon Moses Jenkins, of Historic Scotland, will look at the different methods of sympathetically insulating and improving U values in traditional buildings. Local residents and property owners are invited to bring along photographs of problems they have in their properties and James & Moses will be happy to give advice on causes and cures.

WHITEHAVEN TOWNSCAPE HERITAGE INITIATIVE

Funded by:

Programme

10:00 - 10:15 Registration

10:15 - 10:45 Maintenance of Traditional Buildings
